

Profile of the Bright lens information Technology

Bright lens information Technology, Headquartered in kabul, Serving the Entire Afghanistan

Bright lens information Technology is a leading security service provider based in the Kabul area but servicing the entire Afghanistan. For several years we have been providing Business Owners and Homeowners in Kabul and nation-wide with Loss Prevention methods and personal protection products. Our daily goal is to provide the most professional installations and services of security cameras, remote access, access control systems, video surveillance systems and custom security alarms for all residential and commercial applications. We aim to become the leading service provider of custom surveillance systems across the nation by exceeding our client's expectations of service and professionalism. Bright lens information Technology is building toward "Protecting the Lives of Thousands, One Family or Business at a Time".

With several years of experience Bright lens information Technology has serviced several hundred homes and commercial locations nation-wide. We are able to create a secure environment at your home through the installation of an indoor and / or outdoor surveillance system. We are fully equipped and educated to install a system of any size. We install anything from a 4 channel system to a 100 channel system

Perhaps it's a more discreet system that you need, in which case you may want to check out a nanny cam or hidden camera for your surveillance needs. We assist in establishing hidden surveillance systems to protect your family or business.

Bright lens information Technology is there to provide professional design and advice when installing your new system; Such as the best places and angles to install your cameras and DVR. We are able to integrate several locations and systems allowing the user to monitor multiple locations with ease.

Bright lens information Technology is an innovative security provider, bringing custom cutting edge technology to your office and home. We bring the future of security to your family and have made it as easy as click of a button. With cost effective and easy-to-use top of the line technology, Bright lens information Technology brings the 'every day' office in to a new dimension.

Providing you with the peace of mind and sense of security you deserve. With years of experience and knowledge in both security and camera's we have learned how valuable a surveillance system is and the peace of mind it creates. You and your family deserve the best protection. With Bright lens information

Technology we strive to make sure that you get the best service and products available. Bright lens information Technology is the solution to your Security needs!
